

Replacement Fluoropolymer Lined Internals for Glass Lined Vessels

Are you replacing your glass lined internals frequently? Consider relining with a fluoropolymer.

PFA
PTFE
M-PTFE
ECTFE
ETFE
PVDF
XLPE
HDPE

Let us recommend the material and technique best suited for your process conditions.

Ceramic. Graphite. Heat Exchangers. Process Equipment

Fluoropolymer Lined Component Request

CONTACT: _____ COMPANY: _____

EMAIL: _____ PHONE: _____

1. Component

Description: _____

2. Is drawing or sketch included? Yes _____ No _____

3. Is ASME design code required? Yes _____ No _____

4. Is ASME Code stamp required? Yes _____ No _____

5. What is material the liner will be applied on? _____

6. What is maximum operating pressure and temperature? _____

7. Is there possibly of vacuum under normal or upset operating conditions? Yes _____ No _____

8. What are the current materials of construction (including lining if lined)?

9. Describe Process fluid (include all components)

10. Is there a specific liner material you would like quoted? _____

11. What is the main purpose of the liner (non-stick, corrosion resistance, abrasion resistance, etc) ?
