ProcessSYSTEMDesign

Turnkey packaged system

Custom designed skid package system may include instrumentation, PLC, HMI, piping, electric and platforms, ladders, and other safety features per job requirements

Consulting services

Trouble-shooting, optimizing, and evaluating of existing plant operations

Engineering design package

- Complete engineering and operations package
- Process simulation and design
- Safest and most reliable design at required temperatures and pressures
- Haz-Op review before production
- Controls and support instrument loops

Major equipment package

- Heat Exchangers • Pumps • Filters • Vessels • Tanks • Columns • Others
- Working with technology partners worldwide, we utilize the most appropriate technology to provide a cost-effective design focused on safety and reliability
